

A Case Study

*Name of the Child : Manikantha
Father : D Danumjaya
Mother : Jayashree Priyanka
Address : #2-71/1, Nagulapally (V),
Kodair(M), Nagar Kurnool Dt.,
Telangana*

- *Manikantha started having respiratory distress since 15 days of his birth, difficult to breathe. His father Dhanumjaya is a daily wage earner earns a very meager income and meets his family expenses with very much difficulty. He took his son to the nearest hospital in his village Nagulapally in Nagar Kurnool district, Telangana. Doctors checked the child and expressed that he might be having a heart problem and advised to them to seek specialized care and take him to the city for further evaluation and treatment.*
- *Parents brought Manikantha to the STAR hospital referred by the local doctors. Cardiologist at STAR hospital conducted a thorough examination using a 2D echo scan which revealed that Manikantha is having a large hole in heart, specifically Ventricular septal defect (VSD). Doctors identified that the child needs to undergo open-heart surgery urgently RMBT Shunt, thus the father was advised to seek help from Hrudaya Foundation for financial assistance for treatment as the cost of this essential surgery was beyond the family's financial means.*
- *Following the doctor's advice, Dhanumjaya approached the foundation and requested to help his child for treatment. Through the funds contributed by Laurus Charitable Trust, this child was operated on 24.09.2024. Post surgery, the child recovered after a week*

- *The family expressed profound thanks to the donors and medical teams whose kindness and expertise restored their son's health and happiness.*

Many such children in need of treatment were helped through the generous kind donation and helped them lead a normal healthy life.
