

The influence of our donors' support and contributions is exemplified through Ajay's story, underwent surgery in 2006

Good morning sir/madam,

When I was just 5 years old, I underwent open-heart surgery. At that time, my family was struggling financially, and it was you (Hrudaya Foundation) that came forward to help us. Your support gave me not only a second chance at life but also gave my family strength and hope.

Because of that help, I was able to pursue my studies. I completed my B.Tech at Guru Nanak Institution of Technical Campus, and now I am preparing for my career by undergoing training at 10K Coders in Java Full Stack Development.

What I am today is possible because of the timely support of Hrudaya Foundation. I will always remain grateful for their role in my journey.

Thank you so much - Ajay

Ajay's Journey: From Heartbreak to Hope

Early Life and Struggles

Ajay's life began with a daunting challenge. Diagnosed with a hole in the heart immediately after birth, his future seemed uncertain. His father, Tirupathi, a hard-working farmer in Adilabad district, struggled to provide for the family, which included Ajay's sister. The family's financial constraints made it difficult to access the

specialised medical care Ajay desperately needed.

In their quest for treatment, Ajay's parents made their way to a specialised hospital in Hyderabad. Unfortunately, they were misled by an individual who promised assistance for Ajay's treatment in exchange for Rs 30,000. This betrayal left the family both financially depleted and heartbroken. With no other options, they returned to their village, feeling hopeless as they watched their son suffer from inactivity and breathing issues.

A Ray of Hope

Just when it seemed all hope was lost, a beacon of light appeared in the form of the "Hrudaya Cure A Little Heart Foundation". Founded in 2005 by Dr Gopichand Mannam and his friends, this foundation in Hyderabad was dedicated to helping children with heart conditions. Hearing about this new possibility, Ajay's parents wasted no time and sought assistance from the foundation.

Ajay was about 5 years old at the time, and the family was helped by the foundation. On September 22, 2006, Ajay underwent a VSD surgical closure, a procedure made possible by the generous contributions of Hrudaya donors from USA. This operation was a turning point in Ajay's life.

A Bright Future

Today, Ajay is a vibrant 23-year-old who has successfully completed a degree in Engineering ([B.Tech](#) ECE) and is pursuing additional computer courses. His aspirations extend beyond personal success; he is determined to support his family and also give back to society. Ajay aspires to assist those in need of medical treatment, inspired by the kindness he received from strangers.

Living a normal, healthy life, Ajay's story is a testament to the power of compassion and community support. The donors and the dedicated team at Hrudaya Cure A Little Heart Foundation played a crucial role in transforming his life, allowing him to thrive and dream of a future where he can make a difference.
